UV-EFFECT TRANSPARENT

TRANSPARENT UV-SPRAY WITH
FLUORESCENT EFFECT!

ONLY VISIBLE UNDER INCIDENT UV LIGHT!

Montana UV-EFFECT is a transparent effect paint that is only visible under direct UV light. Able to be sprayed on nearly any substrate, the colorless and semi-gloss paint is not visible in sunlight rather illuminates when exposed to UV light with a glowing, blue-purple color. Ideal for indoor use, the luminous spray can be a great tool not just for making art or art happenings, but also in practical contexts such as Guerilla Marketing, night clubs, venue and property marking. The Montana UV-EFFECT Spray can be applied to numerous substrates such as coated and uncoated screens, masonry, wood, glass and more. The UV light effect becomes more prevalent, the more coats are applied particularly when applied with a stencil. Visibility: Due to the UV EFFECT's semi-gloss finish, the UV EFFECT spray can be slightly visible if painted on a matt substrate.
