

For enhanced longevity it is recommended so prime plastic surfaces with Montana PLASTIC PRIMER prior to application of further coats of spray paint

PLASTIC PRIMER

FOR PLASTIC SURFACES

Montana Plastic Primer is the perfect pre-treatment for plastic surfaces. After priming and drying, plastic surfaces can be painted with Montana sprays that have a synthetic, acrylic, or nitro-combination base. Can be used with the following types of plastic:

Polypropylene Rubber, Modified (EPDM),
Acrylic Butadiene Styrene Plastics (ABS), Glass-Fibre Reinforced
Plastics (GfK), Hard Polyvinyl Chloride (Hard-Pvc),
Polyurethane (PUR), Polystyrene (PS), Polyamide (PA)

It is recommended to test before use. Drying time varies depending on temperature and humidity and may take a few hours. Available as 400ml.
