

POLYSTYRENE PRIMER applied in several layers to seal the surface completely

T 2200 Polystyrene Primer
TNR: 376337

POLYSTYRENE PRIMER

FOR POLYSTYRENE SURFACES

The Montana Polystyrene Primer provides for an additional (protection) layer on Polystyrene, which makes varnishing with acid free paint possible. The primer seals the styro-foam and avoids destructive reaction of the lacquer. Always test before use on a non-visible area of the object. Drying time varies depending on temperature and humidity and may take a few hours. Available as 400ml.
